

Highland Fuels: Committed to a Sustainable Future

At Highland Fuels, we recognize the critical role we play in reducing our environmental impact and supporting Scotland's journey to net zero. We are committed to providing our customers with cleaner energy solutions while remaining at the forefront of innovation in the sustainable fuels sector.

We believe that actions speak louder than words and are actively demonstrating our unwavering commitment to sustainability and setting clear examples for others in the industry.

- **Offering Renewable Fuel Alternatives:** We are a leading supplier of Hydrotreated Vegetable Oil (HVO) and ISCC EU Certified renewable diesel fuels (RMGO). These biofuels are derived from sustainable sources like vegetable oils or food waste fats and can significantly reduce CO2 emissions by up to 90% compared to traditional fuels.
- **Members of the Renewable Fuel Declaration Scheme:** allowing us to provide our customers with certified evidence of the HVO's authenticity and #environmental benefits.
- **Leading from the front:** We have converted our entire delivery fleet on Orkney to run on HVO showing we are committed to leading the industry towards a sustainable future.
- **Investing in the Future of Mobility:** We are actively exploring the installation of Electric Vehicle (EV) charging stations at our forecourts and other strategic locations. This will contribute to the widespread adoption of cleaner transportation options.
- **Embracing Emerging Technologies:** We are constantly evaluating new advancements in sustainable fuels, such as hydrogen, green electricity, and renewable liquid fuels. This ensures we can offer our customers the most up-to-date and environmentally friendly solutions.
- **Going the Extra Mile for Customers:** Our dedicated team is committed to helping businesses achieve their sustainability goals. We partner with clients to find solutions that meet their specific needs and exceed industry standards for environmental responsibility.

We are on a continuous journey towards a more sustainable future. By providing cleaner fuel options, investing in new technologies, and partnering with our customers, Highland Fuels is determined to play a leading role in building a greener Scotland.
